

# COLLECT LIDS

## for Guide Dogs

**Do not throw away the lids of PET bottles or shampoos, collect them instead. In this way, you not only protect our environment, but also support us training a puppy to become a guide dog.**

### WHICH LIDS?

You can collect all kinds of lids made of hard plastic. Only lids with polyethylene and polypropylene screw caps are suitable for recycling.

### HOW TO COLLECT?

Please collect them dry, clean and remove foreign materials such as cardboard.

### WHERE TO DROP?

You can hand in the lids directly to Innorecycling Hörnlistrass 1 in 8360 Eschikon TG, at one of the many collection points or at the guide dog schools in Allschwil and Goldach.

### WHO BENEFITS?

The recycling company pays 30 Rp. per kilogram of plastic lids collected. The proceeds benefit both schools.

### MORE INFORMATION

On Facebook you will find, among other things, the current overview of the collection points (under files) as well as the latest information on the campaign:
